

Nisser.

Der findes mange forskellige nisser. Der er kravlenisser, gårdnisser og drillenisser. Men vi kan bedst lide drillenissen. Drillenissen tryller fx mælken blå. Kravlenisser deler gaver ud, når man sover, og gårdnisser bor på en gård. Nisser sover fra den 24. december til den 1. december næste år. Hvis man ikke giver dem risengrød bliver den sur og laver ballade.

There exist many elves. There is crawlelves, farmelves and the annoyingelves. But we like the annoyingelves the most. The annoyingelves enhance the milk blue. Crawlelves share gifts while you sleep, and farmelves lives on a farm. Elves sleeps from the 24. of december to the 1. of december next year. If you dont give them rice pudding they'll get angry and mess up everything.
